PROFILE

I was born on the French west coast. Since my childhood, I have dedicated a great place in my heart to the ocean. As both a swimmer and a beach lover, I used to spend every free time either in a swimming pool to keep training or on the beach to go surfing, observing waves rolling, or meeting littoral species. Enjoying traveling, I've visited reef islands ecosystems during my bachelor and sadly found how these ecosystems are vulnerable to climate change. In this context, I decided to start a Ph.D. on coastal protection in French Polynesia. I focus now on benthic functionality and benthic communities. My works involve a combination of fieldwork, experiments, and advanced statistical modelling across local and large spatial scales.
